3. Which are the benefits of these certification programs?

Compliance and risk management have become more important after the crisis. Firms must provide evidence that they rely on qualified professionals.

Our certificates can benefit employees, consultants, and organizations.

Benefits for Employees and Consultants

a. More money: Several salary surveys reveal the power of certificates to boost income.

These surveys show that **certified professionals earn more money** than non-certified professionals, as their skills grow and can command a higher pay check.

b. Better position: Certificates are important when being considered for a promotion or other career opportunities.

You give the necessary assurance that you have the knowledge and skills to accept more responsibility.

c. Better job: Certificates differentiate yourself from your competitors.

d. Professional credentials: Certification and training listed on your resume demonstrates your ability and your desire to stay current.

Benefits for Organizations

a. Independent evidence: Certificates serve as independent evidence that employees and contractors have the skills required to support risk and compliance management projects.

b. Job satisfaction: Certified employees are more satisfied and more productive than their non-certified counterparts.

c. Due care: Certified professionals greatly assist employers in constructing a viable risk and compliance management program and proving that they exercise due care.

Yes. We do not promote any products or services. We are 100% independent.

All the questions of the exams have been reviewed and approved by a group of subject experts on behalf of the association.

No. If you study the presentations, you can pass the exams.

Risk and compliance management is not something you have to memorize; it is something you must understand.
